Dante Berti is globally recognized as one of the best producers of sliver cans: our Clients are fully satisfied with the high quality of our products throughout the years

Can body is manufactured only with virgin pellet HDPE, a formula that ensures resistance and avoids plastic cracking over time

Metal components are manufactured with steel galvanized in zinc bath, in order to offer a high resistance to rust and scratches

Castors Everclean© are patented, made of special aluminium to ensure resistance and with a nylon wheel to guarantee fluency

Springs have a patented technology that allows a linear response and avoids any potential damage to content

Plates are a reasonable compromise between the friction zoned suitable for finest counts and the latest models of high-speed coilers
