

**Dante Bertoni**  
Trolley division

# Traditional trolley

*Light, flexible and extremely resistant trolley aimed at several different industries, from industrial laundry to hotellerie*

The **body** is manufactured in **virgin high-density polyethylene (HDPE)**: it is **flexible** and **not deformable, light and scratch & abrasion-proof**. On request, it **can be perforated** to allow a rapid drying of towels and linen and heat dispersion

**Profiles** are made of **high-quality aluminium** in order to strengthen the overall structure, and they can be **protected by** applying **coloured rubber bumpers**

**Wheels** are available in **different formats and sizes** (from dia 80mm to 150) and can be **positioned at convenience** depending on the content of the trolley

Trolleys can be equipped with a **mobile bottom** that ensures the **lift of the content** maintaining levelled horizontal bottom independently from the load location

## STANDARD FORMATS

Length (mm)	Width (mm)	Height (mm)
800	450	800
800	600	650
850	600	800
1000	600	800
1150	600	800
1200	800	950

Formats and sizes can be customized on request

### BODY COLOURS AVAILABLE

### OTHER OPTIONS AVAILABLE

**Body with holes ("perforated body")** is available on request to store and handle wet linen

# Trolley's optionals (1/2)

*A wide range of options is available to customize the trolley at user's request*

## MOBILE BOTTOM (PANTOGRAPH)

Independent device, provided with a pantograph that **ensures the lift of the content maintaining levelled horizontal bottom** independently from the load location

## CASTORS

### **Castors "VLK Blue Line DANTBERT" - Nylon-Polyurethane.**

Supplied with fixed, swivel or swivel with bracket supports. Galvanized steel base, available also in version with AISI 304 stainless steel support. A right compromise between hardness and wear resistance, suitable for professional use in various industrial environments for the internal handling of materials through trolleys, containers, platforms, etc.

**Dimensions:** dia. mm Ø80x110h; dia. mm Ø100x130; dia. mm Ø125x158h; dia. mm Ø150x181h

**Castors covered with gray rubber**, supplied on request with the following supports: fix, swivel and swivel with brake.

This type of wheels is used in the structures where noise and tracking of the floor are to be avoided (es: hospital, retirement homes, office, etc). Their particular composition makes these wheels suitable for indoor and outdoor

**Dimensions:** dia. mm Ø100x130; dia. mm Ø125x158h; dia. mm Ø150x181h

# Trolley's optionals (2/2)

*A wide range of options is available to customize the trolley at user's request*

## BUMPERS

Extruded PVC gasket available for any different standard trolley size. Its main function is to absorb all the shocks that normally undergo the container during the handling phase. Alternatively, it is used as an identifying element to distinguish the various contents inside the containers or their using department

**Colors:** Yellow Fluo, Fuxia Fluo, Green, Orange Fluo, Light Blue and Dark Blue

## HANDLES

- **Tilting handle**, made of high-density polyethylene

**Color:** natural

- **Hole handles** applied at user's request

## COVER

Made of virgin HDPE and reinforced with aluminum profiles, the cover protects the trolley content by damages and dust. The hole handle make it very easy and secure to open and close the very light and resistant cover

**Colors:**

# Box Roller

*Light, manageable and extremely resistant box roller, suited for material movements, either for material logistics inside the structures or for material movement outside*

Dante Bertoni Box roller is the **perfect way to move** towels and linen **in an orderly and secure manner** within laundries and hotel spaces given its **resistance, lightness and maneuverability**

It is available in **different versions: Open front** or «**4 walls**» completely closed with tilting front door

The **body** is manufactured in **virgin high-density polyethylene (HDPE)**: it is **flexible** and **not deformable, light and scratch & abrasion-proof**

**Profiles** are made of **high-quality aluminium** in order to strengthen the overall structure, and they can be **protected by** applying **coloured rubber bumpers**

The Box roller can be **customized to meet the user needs** and **accessories** are available on demand, e.g. **handles** to ease the movement from one site to the other

## STANDARD FORMATS

	Length (mm)	Width (mm)	Height (mm)
Boxroller Openfront	800	700	1700
Boxroller 4 Walls	800	700	1700

**Formats and sizes can be customized on request**

# Cabinet

NEW

*Light, manageable and extremely resistant cabinet, that can be provided, on request, with an autonomous RFID module and management software*

The **Cabinet** is manufactured in **HDPE**, while **aluminium profiles** strengthen the overall structure

HDPE **body**, available in **multiple colours**, not deformable, is **light** and **scratch / abrasion-proof**

## STANDARD FORMATS

	Length (mm)	Width (mm)	Height (mm)
Cabinet	1200	600	1500

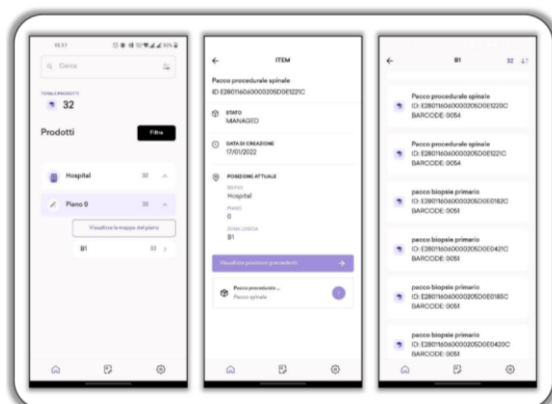

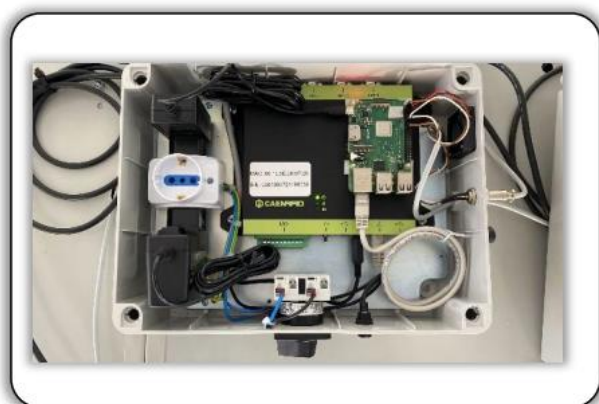

Formats and sizes can be customized on request

## RFID Module

When equipped with RFID management software, the Cabinet talks to the **proprietary cloud application, supplying content details:**

- numbers of articles
- articles type
- location of the trolley (allowing to manage multiple cabinet content in the same building)

# The logistic advantage of Dante Bertoni Trolleys

*Dante Bertoni trolleys can be delivered disassembled, thus reducing transport costs...*

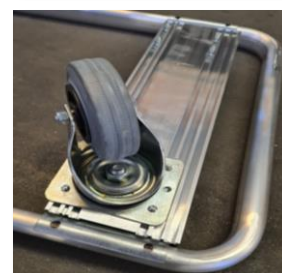

Up to **10** disassembled trolleys per pallet

*...and then quickly and easily assembled at destination*

The assembling procedure requires **few simple steps**:

1. **Pull out the trolley bodies**, one placed inside the other during the shipment
2. **Insert the top ring frame and the bottom ring frame** on each body and **rivet them**
3. **Mount the crabs** on the bottom ring frame and **insert the screws** to couple the castors
4. **Screw the castors**
5. **Insert** either the **bottom** or the **mobile bottom**
